

Hundreds of threats a day. Five that matter to you.

Here's the whole thing in one picture.

OR JUST ASK IT

“Is this flaw a problem for us?”

→ One-line verdict + evidence

“Is this IP address dangerous?”

→ Instant reputation check

“What happened this week?”

→ Plain-English summary

Add a new source, a new client, or a new report type — the engine never changes.

Runs on a laptop · Costs cents per report · Cannot touch your systems — it only writes reports

Where it sits, what it reaches, what it keeps.

Everything runs on one laptop. Data only moves in the directions shown.

PUBLIC SOURCES · read-only, outbound HTTPS

STAYS HOME

Your profile, your keys, your reports

GOES OUT

Read requests to public sources; the shortlist + profile to Claude

NEVER

Inbound connections; changes to your systems; keys to anyone else
